## Technical Skill

- PHP, Laravel Stack
- MERN Stack

## Languages

- Burmese and Shan (Myanmar), mother tongue.
- English (intermediate)
- Thai (upper intermediate) Chinese (HSK3)

## Profile

I'm Sai Aung Wann — a former civil engineer who unexpectedly found a deep passion for web development. My journey began in Myanmar, where I worked in site construction and project management. Later in Singapore, I dove into online learning through Code Wall Technology, mastering the fundamentals of HTML, CSS, Bootstrap, and JavaScript.

With Creative Coder Myanmar, I explored more advanced web development concepts including ES6, Git & GitHub, and React.js. I also gained hands-on experience with Firebase for backend integration, along with full-stack technologies like the MERN (MongoDB, ExpressJS, ReactJS and NodeJS) and PHP-Laravel stacks — empowering me to build fully functional web apps with authentication, databases, and smooth hosting. Now, I'm READY to bring powerful, seamless web applications to life — from frontend to backend.

## Project Experiences

**Freelance Web Developer** Jan 2025 - Current  
Bangkok, Thailand
